

REMARKS

Claims 10-26 continue to appear in this application for the Examiner's review and consideration.

In response to the Examiner's further restriction requirement, applicants again elect the Group I claims, namely composition claims 10-11 and 14-24, for prosecution in this application. Accordingly, claims 12-13 and 25-26 are indicated as currently being withdrawn.

As noted in the office action, claims directed to a method of use of a compound or composition may be considered with a compound or composition claim after allowable subject matter is found for the compound or composition claims. Accordingly, when these Group I claims are found to be patentable, claims 12, 13, and 25-26, which depend from the Group I claims, should also be allowed since they will include all the patentable features of the Group I claims by virtue of their dependency on those claims.

Respectfully submitted,

Date: 12/6/04
